## PREFACE

The Council of Canadian Fire Marshals and Fire Commissioners (CCFM/FC) is a national organization through which issues relating to fire prevention can be discussed constructively in an atmosphere of mutual respect, cooperation and understanding. Its primary objective is to advise on and promote legislation, policies, and procedures pertinent to fire protection; participate in the development of codes and standards relating to fire safety; promote fire safety awareness; support the professional development of the Canadian fire service; identify trends relative to the causes and the severity of fire; provide advice to Accredited Agencies involved in the certification and testing of fire protection equipment and materials relating to fire safety and provide a forum for the exchange of information on fire safety matters.

The 2002 Annual Report of Fire Losses in Canada is the 81st edition to be published. It is prepared by Fire Protection Services, Human Resources and Social Development Canada, and it is compiled from information supplied by the Council of Canadian Fire Marshals and Fire Commissioners (CCFM & FC), Indian and Northern Affairs Canada (INAC) and Statistics Canada.

Sincerely,

Eugene Marotta, P. Eng.  
Director  
Fire Protection Services  
Human Resources and Social Development Canada

March, 2007

## SUMMARY

In 2002, a total of 53 589 fires were reported; 304 fire deaths; 2 547 fire injuries; and a total of \$1 489 012 263 in property losses.

The "Residential Property" classification continues to account for the largest number of fires. In 2002, there were 22 186 fires in this category, 41% of the Canadian total. These incidents resulted in 250 deaths or approximately 82% of the nation's fire fatalities. The monetary loss amounted to \$712 million, which is 47% of the total loss.

The property classification showing the second largest number of fires is "Special property and transportation equipment," where 19 396 fires were reported, accounting for approximately 36% of the overall Canadian total. Under ground transport vehicle, 10 899 incidents were reported, amounting to a dollar loss of \$76 million. The total dollar loss for the "Special properties and transportation equipment" classification is \$137 million.

In Table 5 "Source of Ignition" the following three groups (not including miscellaneous) lead the list of number of reported fires and property dollar loss: "Smoker's Material and Open Flame" with 9 414 and a dollar loss of \$231 447 720, "Cooking Equipment" with 5 541 incidents and a loss of \$81 million, and "Heating Equipment" with 5 301 incidents and a loss of \$124 million.

Table 7 provides a review of the fire data identified under the heading of "Act or Omission." As in the past, the category of "Mechanical, Electrical Failure and Malfunction" had the greatest number of recorded fires, that being 10 800 and a dollar loss of \$295 million. "Incendiary or other set fires" accounted for 9 990 incidents with a dollar loss of \$242 million.

In summary, "Residential Properties" remains an area of utmost concern. The large number of electrical incidents and the associated dollar loss, as well as the number of "Incendiary fires" and the associated dollar loss, are two other areas of major concern within the Fire Services. A continued effort by all fire protection authorities as well as the public is most imperative in order to reduce the loss of lives, number of fires and property damage.
